Soft Skills

Communication

Ownership

Problem solving

Languages

Spanish - Native

English - B2 (Intermediate -
reading, writing, speaking)

Skills

Backend: .NET Core, C#,
Node.js, TypeScript, SQL Server,
REST APIs

Frontend: Angular, Vue.js,
JavaScript

Architecture: Clean
Architecture, Microservices,
Distributed Systems, SOLID

Profile

Senior Software Engineer with 5+ years of experience building scalable backend, cloud, and distributed systems across B2B ecommerce, legal-tech, academic platforms, payment workflows, and enterprise integrations.

Experienced across .NET, TypeScript, Node.js, Angular, Azure, AWS, Docker, Kubernetes, SQL Server, RabbitMQ, CI/CD automation, observability, and production support.

Focused on clean architecture, resilient service design, cloud modernization, performance, and full-lifecycle ownership from technical design to deployment, monitoring, and continuous improvement.

Employment History

Senior Software Engineer, Softtek | Clients: Kaplan, Bisk | Remote, Colombia

JAN 2023 - PRESENT

- Led integration work across university APIs, Salesforce CRM, HubSpot, CyberSource, and InterPayments, improving payment and workflow reliability while reducing integration-related incidents by ~15-30%.
- Strengthened operations and release delivery through scheduled jobs, retry processing, structured logging, Docker, Docker Compose, Jenkins, Azure Pipelines, Azure Repos, and AWS deployments, reducing manual effort and deployment friction.
- Refactored and adapted system architecture to support Azure migration and cloud modernization, using Azure Blob Storage, Redis, Key Vault, cloud resources, and secure configuration patterns to improve scalability, security, and operational readiness.

Senior Software Engineer, Cl&T | Clients: Coca-Cola, Caret Legal | Remote, Colombia

AUG 2022 - JAN 2023

- Owned backend and full-stack delivery across legal-tech and B2B ecommerce platforms, spanning monolithic and microservice architectures with .NET Core, SQL Server, Azure, Angular, Vue.js, TypeScript, and Clean/Hexagonal Architecture.
- Led Azure modernization work with Azure Functions, Key Vault, Redis Cache, Blob Storage, Azure Monitor, Application Insights, and automated tests, improving reliability, observability, and migration stability.
- Designed integration-heavy services for WhatsApp chatbot commerce flows, connecting Infobip, Amebot, Vue.js shopping-cart experiences, and external bottler providers such as Andina, Bandeirantes, and Nayar.
- Managed production releases through GitHub Actions, YAML workflows, Bitbucket Pipelines, Azure Boards, and unit, integration, and E2E testing practices.

Skills

Cloud & DevOps: Azure, AWS, Docker, Kubernetes, GitHub Actions, Azure Pipelines, Jenkins

Integrations: RabbitMQ, Salesforce, HubSpot, WhatsApp API, CyberSource, Redis

Testing: Unit, Integration, E2E, CI/CD

Semi Senior Software Engineer, Yuxi Global, Remote, Colombia

JAN 2022 - AUG 2022

- Supported Azure modernization and refactoring of legacy applications, improving scalability, cloud readiness, and operational risk posture.
- Improved backend reliability by implementing Redis caching and centralizing secrets/configuration with Azure Key Vault, reducing repeated DB calls and configuration-related issues.
- Delivered Angular REST API integrations and supported Azure DevOps automation under Scrum, improving frontend maintainability and reducing manual delivery steps by ~15-30%.

Software Developer, MVM Ingenieria de Software, Remote, Colombia

MAY 2021 - JAN 2022

- Developed backend and data-access components with ASP.NET, Entity Framework, and Oracle SQL, improving performance and data reliability in key workflows.
- Applied layered MVC architecture and design patterns to improve maintainability and reduce rework.

Software Developer, Ingenieria de desarrollo IDL SAS, Bogota

JAN 2021 - MAY 2021

- Built and shipped features for a spare-parts management system supporting automotive operations for brands such as Chevrolet and KIA.
- Optimized SQL Server queries, stored procedures, functions, bulk operations, and linked-server inventory retrieval, reducing response times by ~30-60% and lowering intermittent failures by ~15-30%.

Education

Systems Engineer, Universidad Central, Bogota

2018 - PRESENT

English (B2 - Intermediate), Universidad Central, Bogota

2022

Courses

AWS Academy Cloud Foundations, Amazon Web Services (AWS)

OCT 2024

AWS Academy Introduction to Cloud, Amazon Web Services (AWS)

OCT 2024

Scrum Project Management Fundamentals, CertiProf

MAR 2021 - APR 2021
